Video title: Basic Disk to Dynamic Disk Conversion
TI: 9.1.2

Step 1		Description
#1	**Video 1**	Right-click on My Computer and click **Manage.** The Computer Management window will open.
#2	**Video 1**	In the Left window pane click **Disk Management**. In the lower portion of the right hand side, right-click on **Disk 0 Basic** and Click **Upgrade to Dynamic Disk**
#3	**Video 1**	The Upgrade to Dynamic Disk window will appear. Be sure there is a check mark in the box next to Disk 0 and click **OK**. The next window is Disk to Upgrade, check to be sure the information is correct and click **Upgrade**.
#4	**Video 1**	A window will appear called Disk Management. It will ask "Are you sure you want to upgrade?" click **Yes**. One last warning will appear about dismounting the file system. Click **Yes**. Click **OK** to reboot this will complete the upgrade process.
Step 2		
#5	**Video 2**	Once the computer reboots, log back on. A **System Settings Change** window will appear, stating Windows 2000 has installed new devices and will need to restart. Click **Yes**.
#6	**Video 2**	Once the computer reboots, log back on. Navigate back to the **Disk Management** screen (using the steps above).
#7	**Video 2**	Notice where it says Disk 0, it now says **Dynamic** instead of Basic. The conversion is complete.
