

Video Title: Creating a Windows Startup Disk
TI: 5.6.5

Step 1	Description
#1 video 1	Click Start >Settings > Control Panel , this will open a new window with programs contained within Control Panel.
#2 video 1	Double click on Add/Remove Programs , then click on the Startup Disk tab and click Create Disk
#3 video 1	Now the computer will ask for a diskette to be inserted in the A: drive, put one in if necessary. Then push Enter when finished.
#4 video 1	Windows will prepare files and then a prompt will appear asking for a diskette to be inserted in the A: drive then click OK , all the needed files will be copied to the diskette.
#5 video 1	To check the files on the diskette double click My Computer , then double click 3½ Floppy (A:) to view the contained files.
#6 video 1	Next, by typing ' exit ', this will close the command window, and making a DOS boot disk is complete.
